Contents Volume 35 (2002)

Numerical studies for the thermal regime of a roadbed with insulation on permafrost
J. Liu and Y. Tian 1
The record of atmospheric CO_2 derived from the stable carbon isotopic composition of buried plant in perennial frozen lacustrine sediments
L. Qing, C. Guodong and P. Ping'an 15
Use of dissolved organic matter to support hydrologic investigations in a permafrost-dominated watershed
D. White, K. Yoshikawa and D.S. Garland 27
Thermal regime in the embankment of Qinghai–Tibetan Highway in permafrost regions
S. Yu, Z. Jianming, L. Yongzhi and W. Jingmin 35
Lateral deformation of freezing clay under triaxial stress condition using laser-measuring device
T. Ono 45
The temperature dependence of the effective elastic shear modulus of snow
J. Schweizer and C. Camponovo. 55

Editorial 65

On the flexural strength of DUT-1 synthetic model ice
Z. Li, Y. Wang and G. Li 67
Theoretical frame of the saturated freezing soil
L. Ning, F. Chen, B. Su and G. Cheng 73
Preliminary microstructural and microchemical observations on pond and river accretion ice
D. Iliescu, I. Baker and D. Cullen 81
Evolution and hydraulic resistance of anchor ice on gravel bed
D.J. Kerr, H.T. Shen and S.F. Daly 101
Application of neural networks to predict ice jam occurrence
D.D. Massie, K.D. White and S.F. Daly. 115
A physical SNOWPACK model for the Swiss avalanche warning Part I: numerical model
P. Bartelt and M. Lehning 123
A physical SNOWPACK model for the Swiss avalanche warning Part II. Snow microstructure
M. Lehning, P. Bartelt, B. Brown, C. Fierz and P. Satyawali. 147
A physical SNOWPACK model for the Swiss avalanche warning Part III: meteorological forcing, thin layer formation and evaluation
M. Lehning, P. Bartelt, B. Brown and C. Fierz 169
Fingerprinting soil organic matter in the arctic to help predict CO_2 flux
D.M. White, D. Sarah Garland, X. Dai and C.-L. Ping 185
Laboratory experiments of ice scour processes: rigid ice indentor
A. Barker and G. Timco 195
Nonlinear analysis for the three-dimensional temperature fields in cold region tunnels
Z. Xuefu, L. Yuanming, Y. Wenbing and Z. Shujuan. 207

Contents Volume 35 221
